**THE HIGHEST SCORING
PREMIUM LANE.**

SOLID VALUE
in a sport lane.

EYE-POPPING DESIGNS
in an entertainment lane.

QubicaAMF
GIVES YOU CHOICES.

You have three can't-miss choices in durable, high-scoring, entertaining synthetic lanes from QubicaAMF. HPL Lanes are the highest-scoring premium lane for the ultimate in performance. SPL Lanes provide value in a sport and entertainment lane. MAD Lanes give your customers the most entertaining, glow-in-the-dark fun in bowling with their eye-popping, unique designs.

Whichever your choice, your center will have incredibly long-wearing synthetic lanes that perform consistently day in and day out. The first time a customer bowls on one of these lanes will be a memorable experience – and one they'll want to return for again and again.

From lanes to pinspotters, scoring and entertainment systems to ball returns, QubicaAMF has what you need to outfit your new center or upgrade your existing one. And it all comes with the support you'd expect from the leader in the industry.

HPL Lanes

THE HIGHEST SCORING PREMIUM LANES IN THE INDUSTRY

QubicaAMF HPL Lanes are the highest scoring premium lanes in the industry, period. In fact, nearly times as many 300 games were bowled in the ABC Tournament when HPL lanes were used – the highest in ABC Tournament history. HPL Lanes look like natural wood and provide the explosive power that consistently rewards bowlers with high scores. These high-pressure laminate lanes offer distinct maintenance advantages, too. When you and your customers want the ultimate in lane performance, QubicaAMF HPL Lanes are the only choice.

- Shock-absorbing resincore construction reduces ball bounce and sounds the most like real wood
- Brush finish creates lower surface tension to keep oil in place.
- Thick, high-density pin deck provides explosive pin action for higher scores
- The look of natural maple wood grain
- Alternating light and dark board pattern helps bowlers find their target
- Incredibly high wear resistance means a long, trouble-free lifespan
- Laminate requires no resurfacing, greatly reducing maintenance costs
- Five-foot wide seamless approach and 12-foot panels
- Optional Glow Track option adds colorful excitement when you turn on the black lights
- Precision installation available
- The perfect complement to our new UltraSlide synthetic approach

CUSTOMERS will like
how their scores **ADD UP.**
YOU'LL LIKE how you
ADD CUSTOMERS.

Record-setting HPL Lanes keep your leagues and open play bowlers coming back for higher scores again and again.

ABC TOURNAMENT RECORDS

298 Games	4.4	9.7	221%

QubicaAMF uses GREENGUARD Certified laminates which are scientifically tested to the GREENGUARD Standards for Low Emitting Products, significantly reducing levels of indoor air pollution.

SPL Lanes

THE PERFECT BALANCE BETWEEN SPORT AND ENTERTAINMENT

If you're looking for great scoring lanes that are also a great value for the money, you can narrow your choices down to one: SPL Lanes from QubicaAMF. SPL Lanes have the same great look as our premium HPL lanes – and the same explosive pindeck as well. In fact, most of the outstanding features of our famous HPL lanes come with SPL lanes.

- The same look of natural maple wood lanes, but in a solid phenolic
- Brush finish, unique to QubicaAMF, creates lower surface tension to hold oil in place
- Thick, high density pin deck provides explosive action
- Alternating light & dark board pattern helps bowlers find their target
- Glow Track option adds colorful excitement when you turn on the black lights
- Laminate requires no resurfacing, greatly reducing maintenance costs
- Five foot wide seamless approach and 12 foot panels
- Outstanding wear resistance—every bit the equal of the competition's best
- The perfect complement to our new UltraSlide synthetic approach

FROM A TECHNICAL STANDPOINT, SPL LANES HAVE EVERY POINT IN THEIR FAVOR.

• SOLID CONSTRUCTION

SPL Lanes are 3/8" solid phenolic. SPL solid construction wears better and the brush finish holds oil better than other solid phenolic lanes.

• SIGNIFICANT SAVINGS

SPL Lanes come at considerable cost savings to other solid phenolic lanes, engineered to deliver durable, long-term value.

QubicaAMF uses GREENGUARD Certified laminates which are scientifically tested to the GREENGUARD Standards for Low Emitting Products, significantly reducing levels of indoor air pollution.

ULTRASLIDE APPROACH

THE ULTRASLIDE APPROACH IT'S EVERYTHING YOU AND YOUR CUSTOMERS WANT IN A SYNTHETIC APPROACH, AND MORE.

UltraSlide, the smoothest sliding, most durable synthetic approach for today's entertainment and sport facilities. An affordable alternative to wood, UltraSlide delivers big in a number of important ways:

- Provides a consistent slide across its entire surface
- Has a textured surface with a similar roughness to wood – and twice as close to wood as the nearest competing synthetic approach
- Was developed in conjunction with a specialist in surface technology, using scientific analysis
- Is without question the best synthetic match to real wood in the industry
- Now standard with HPL and SPL ordered with approach
- Also available as an approach upgrade to go with your existing HPL or SPL Lanes

A TRUE STORY OF CUSTOMER APPRECIATION

“I just wanted to drop you a note and let you know how happy we are with our new UltraSlide Approaches. In my 30+ years of traveling all around the world as a bowler and instructor, I never thought that a synthetic approach could play like a wood approach. The new UltraSlide Approach has proven me wrong. It is amazing!!!

I have been overwhelmed lately with customers expressing their appreciation, approval, and enjoyment after bowling on these approaches. Men, women, kids, seniors, low-average, high-average, the comments are all the same....EVERYONE LOVES THEM!!!

Besides being absolutely beautiful and easy to maintain, our customers have all said the same thing, the UltraSlide Approach behaves JUST LIKE WOOD! The slide is true and smooth. The 'uncertainty' of the slide of our old approaches has been eliminated. As an added benefit, I believe the high-scoring potential of HPL has somehow been improved, as many of our high-skilled players (including current Team USA members, current PBA members, and a past QubicaAMF Bowling World Cup champion) have indicated that the improved footing and slide has actually improved their scores. Two days after the install, we have seen the new season high and several 300 games, without any other change in the center, other than the approaches.

I wholeheartedly believe that a new standard in lane surfaces has been created by the UltraSlide Approach. This approach will become the standard that all other synthetic approaches are judged against. Kudos to you and your staff in their development!

Thank you for assisting us in our quest to provide the best bowling experience possible for our customers.

GET CREATIVE WITH MAD LANES, THE BIGGEST “WOW” EXPERIENCE IN BOWLING UNDER BLACK LIGHTS.

MAD Lanes deliver an unforgettable glow-in-the-dark bowling experience that your customers will find incredible, then return again and again to enjoy. Their unique, eye-popping look comes in two stunning designs that dramatically increase the entertainment value of your center's Xtreme bowling experience.

MAD Lanes Highway Design

Imagine your crowd in on Saturday night when you switch the lighting system over to UV to reveal these dazzling highway markings. Not only are they super fun to bowl on, they provide visual reference points for a player's ball delivery.

MAD Lanes Spider Design

Bowling just doesn't get any crazier than glow-in-the-dark lanes in the design of spider webs. These bright designs will grab the enthusiasm of all your guests. Want to up that enthusiasm even more? Install highway and spider designs on alternating pairs for a totally way-out-there look under black lights.

The look of a TRADITIONAL LANE under normal lighting

Under normal light, MAD Lanes synthetic surface looks just like natural wood lanes with all regulation markings.

UPGRADE YOUR LANES EVEN FURTHER

LIGHTED CAPPING

Customers love the bright excitement QubicaAMF Xtreme lighted capping brings to the game. You'll love their durability and ease of maintenance.

- Unbreakable, low-voltage and safe LEDs with 15 year life
- Easy to use controller
- A glow-in-the-dark mounting extrusion that easily fits your capping
- 16 patterns race both across and up & down the lanes
- Simple front desk controller

PIT LIGHTS

QubicaAMF dual pit lights are the most reliable way to enter the Xtreme game. These durable, rugged lights make it easier on you.

- Switch from white to black light and back automatically from front desk
- Light deck with invisible infrared light which scoring camera detects
- Prevent miss-scores due to black-lights or fog
- Bulbs, wiring and front desk switch all included
- Available in 36" for QubicaAMF machines and 48" for Brunswick machines

DURABOWL BUMPERS AND GUTTERS

It's the best bumper in the industry. That's because QubicaAMF's DuraBowl bumpers can more than stand up to kids thanks to their high-tech resin and durable construction. Install DuraBowl bumpers and you'll make the most of the bumper-bowling market from birthday parties, day-care specials and family events year after profitable year. DuraBowl bumpers deliver all the features you have to have.

- Stronger rails
- Automatic and manual models
- DuraBowl colored rails upgrade to clear replacement rails for Xtreme lighting
- Xtreme lighting options work with bumpers up or down
- Won't interfere with lane maintenance equipment
- Available for tenpin and small ball

RADARAY

QubicaAMF's Radaray Plus and Radaray XLI are the world's most trouble-free, cost-effective foul detectors. Both Radaray models are low power users, so they save you money. And both have the features you want and need.

- Install easily on top of the approach and align quickly.
- Unit covers include LED foul indicators.
- Are not sensitive to ambient light or dust particles, eliminating false triggers.
- Are virtually maintenance free.

MAKE END-TO-END IMPROVEMENTS WITH QubicaAMF

MASKING

You can transform the entire feel of your center overnight with new glow-in-the-dark MASQ panels from QubicaAMF and turn the end of your lanes into a focal point your customers will appreciate. They install easily. And their modular design makes upgrading a snap. Add a simple Back-Lit Illumination Kit and enhance the eye-popping colors and themes even further. Add the Curvature Upper Tier to create a smoothly curving surface connecting the tops of masking panels with the ceiling. Optional Spectrum LED lighting, controlled by your front desk, allows you to change the lighting colors from eight different patterns.

BALL RETURNS

OPTIONS BALL RETURNS

PROFILE BALL RETURNS

PROFILE BALL RETURNS

have glow-in-the-dark hoods and complement all QubicaAMF furniture while bringing your center these noteworthy features.

- Smartpath™ distribution guarantees alternate left/right return
- Glow-rail rack stores 11 balls; upgrade rack stores 15
- Strong power-lift motor lifts up to five balls simultaneously
- Has a strong, hard cover for increased durability
- Available as a complete unit or as a hood and rack conversion.
- Optional lower rack holds an additional 10 balls.

OPTIONS BALL RETURNS

have the exact same features as Profile Ball Returns with one distinct difference: a five-inch higher rack for easier ball retrieval. In addition the Options Lift is the only lift in the industry with its motor and control box above the lane level for easier access and maintenance.
